

WATER IN THE WORLD: Deadly drought

Teacher Notes

Syllabus Topic: Stage 4: Water in the World

Sub-topic: Natural Hazards
Hydrological Hazard - Droughts

Syllabus Outcomes: A student:

- describes processes and influences that form and transform places and environments **GE4-2**
- explains how interactions and connections between people, places and environments result in change **GE4-3**
- communicates geographical information using a variety of strategies **GE4-8**

Syllabus Content:

- a) Spatial distribution, cause and impact of the disaster
- b) Responses by individuals, groups and government
- c) Prediction of the impact of climate change
- d) Management strategies to reduce the future impact of similar events

Learning Intention: For students to understand the interconnection between the natural hazard of droughts and health and wellbeing in sub-Saharan Africa.
